THE **POWER** BEHIND **PERFORMANCE**

THE **POWER** BEHIND **PERFORMANCE**

DEEP-CYCLE BATTERIES

We put more in our Deep-Cycle batteries... so you can get more out of it... better performances, higher productivity and less maintenance.

- 1) Z3 Plate Construction : The Z3 plate design combines four integrated features for superior performance and durability.
 - The signature "Diamond Z" grid architecture
 - An inset lug position
 - Upgraded "Active Life Plus" paste material
 - Heavy-Duty – construction: more lead = more power!
- 2) Posi-Wrap Envelope Separators
Posi-Wrap separators reduce maintenance and prevent failure due to short circuiting and plate shredding, ensuring reliability and durability.
- 3) Rigid Connectors Heavy duty TTP, COS and Post connectors deliver maximum electrical efficiency and durability.
- 4) Pro-eye level indicator
A simple, safe and reliable system for inspecting electrolyte levels that signals when watering is required.
- 5) X-TEND Container Design
X-Tend provides more electrolyte above the battery plates so batteries can perform longer between watering intervals.
- 6) Good handles
All our deep-cycles are equipped with handles or hoisting hooks which eases the lifting of the batteries.
